

StudySpace

StudySpace is a content-based resource for teachers and students alike to find helpful information straight from your textbook!

StudySpace allows users to create and find different academic resources directly from specific textbooks. Simply enter the ISBN of your chosen textbook and discover what Studyspace can do for you. Through our website, users can create and publicly post study guides, flashcards, worksheets, quizzes, and other assignments straight from class textbooks. All of these different resources are available for everyone to access, so students and teachers from all across the world using the same textbook can utilize StudySpace as a guide. Implementing coursework from StudySpace saves teachers and professors time and energy while also providing students with the most useful information to advance their learning.
